

Series A Rectangular Tanks

A range of rotationally moulded tanks suitable for water and waste. These tanks are now being used by most of the leading British manufacturers. Originally designed as marine tanks, they have been moulded in virgin grade Linear Medium Density Polyethylene resin, which is natural in colour.

The resin has a long term UV package and is suitable for use in or out of direct sunlight.

These tanks have been moulded to our specification, with a wall thickness of 9mm for tanks over 35 gallons. This extra thickness will combat any odour problems sometimes associated with cheaper thinner walled tanks when used in waste holding tank applications. Because the tanks are bare we can place fittings to customers requirements using our advanced heat fusion technology.

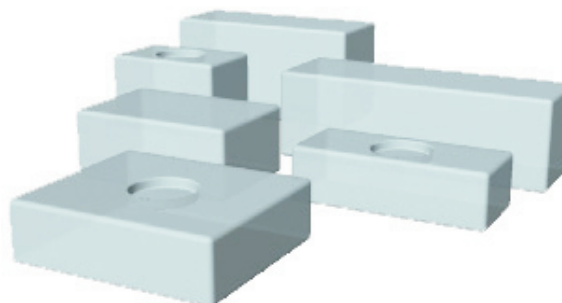

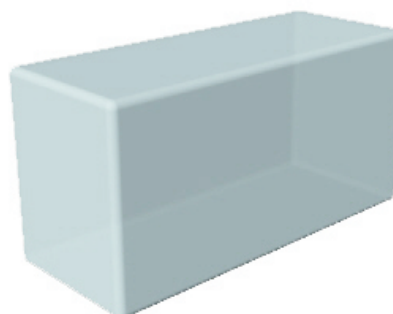

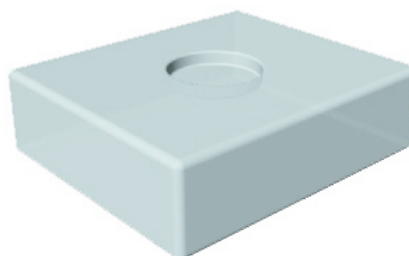

TANKS

Part No.	L	W	H	Litres
50-30-25	500	300	250	36
60-40-25	600	400	250	51
40-40-40	400	400	400	55
60-38-38	600	380	380	76
76-51-31	760	510	310	106
83-35-24	830	350	240	58
83-53-24	830	530	240	104
85-40-42	850	400	420	120
85-40-32	850	400	320	90
83-71-24	830	710	240	122
83-71-24-B*	830	710	240	123
102-41-51	1020	410	510	193
