

SERIES A

BAFFLED TANKS

A range of large baffled tanks suitable for rainwater collection, mobile car valeting and window cleaning operations.

The volumes range from **250** to **1000** litres.

Manufactured from natural semi translucent Medium Density Polyethylene.

These tanks can not be rotated, they can only be used with inspection hatches on the top of the tank.

BAFFLED TANK

SHAPED TANKS

Identical to the Series A Rectangular tanks in material and wall thickness, these tanks are suitable for water, waste and fuel. They will meet CE certification standards once fitted with Tek-Tanks fittings.

We have given you the basic information below, but more comprehensive drawings are available on request.

The drawings for these tanks can be also downloaded from our website.

Please let us know what fittings you require and where and we will price up each tank individually.
