

SERIES C FUEL TANKS

CE marked fuel tanks suitable for petrol and diesel. Manufactured in Italy from High Density Polyethylene.

These tanks are red in colour and come complete with **inspection cover**, **filler cap with vent** and an 8 mm fitting with pickup pipe for fuel **feed**. A fuel return may also be fitted. If you prefer there is a separate vent fitting located next to the feed. This is a 1/2" hose tail.

We can change the size of the fittings if required, you just need to let us know the size of fitting and the type of hose you will be connecting to.

There is also provision to fit a sender unit (for example WEMA range S3-20 to S3-40 suitable for use with gauge IPFR).

If you are filling from a deck filler you will need to purchase our Inlet Connector Kit (Ref TT-5521).

The pack means that you can create either: straight or elbow connection.

The strap kit is ideal for holding these tanks in position (Ref: ST 2340).
