Note

All Tek-Tanks Series A Tanks are subject to a slight amount of distortion during the cooling process. Although very good by normal rotamoulding standards some panels can either dip in slightly or they can bow out. Please allow a certain amount of clearance between the tank wall and the space available. We would suggest a clearance of about 10-15mm all round to be safe.

Helpful Tip

Mark up this drawing with the fittings you require and fax back to 01420 520840 or alternatively scan drawing and email to: seriesatanks@tek-tanks.com
Download the example from our download section: "Series A Tank drawing mark-up example.pdf"

Should you have any questions about the ordering process, lead time or fittings, please contact our Custom Tank Sales Manager on 01420 52030 or email seriesatanks@tek-tanks.com

For a complete list of all fitting assemblies available please go to www.tek-tanks.com/downloads and download the Tek-Tanks fittings sheet pdf file.

TECHNICAL DATA

Volume - 145 Litres

Series A Tank Customer Details Form

This form has been designed to help us process your Series A tank request as efficiently as possible. The Boat Section is not required to process your order but does help us with our tank database compilation. Any personal information will of course be held in strictest confidence and will not be used by any third party. A separate form for each tank is required if you are ordering more than one tank. Series A Tank drawing mark-up example.pdf is available as a guide and can be downloaded from www.tek-tanks.com/downloads Fields shaded in red are required.
